Re: Tiscia O'Brien

To Whom It May Concern:

Please allow me to full endorse Tish O'Brien as a very talented tattoo artist, particularly for natural tattoos such as eyebrow, lips, and breast nipples (e.g. after breast reconstruction surgery). She has years of experience doing these and her results are excellent, making the tattoos look very natural and blending well with the client's natural skin.

In addition, Tish is an exceptional person. A very lovely, friendly, kind and caring person who takes personal pride in making sure that her clients get the best possible results. Her attitude is great and she smiles beautifully all the time. She explains everything to the patients very well in understandable language, so the client knows what to expect from her procedures.

My endorsement comes not only from seeing her work but knowing her for many years. She would be an asset to any entity that wants to hire her for her expertise in performing natural tattoos.

If further information is needed, please call me or email me.

Sincerely,

A handwritten signature in dark ink, reading "Robert L. True". The signature is fluid and cursive, with a long horizontal flourish extending to the right.

Robert L. True, MD
